Swimming

Hiking

Cookery

Travelling

Creative nature paired with a logical approach and a broad range of transferable and interpersonal skills, passionate about cloud products and services that support tangible business processes reengineering and improvements. Active learner of new tech-stack related to CGP, Azure and AWS with a practical approach and easily adaptable to new environments. Consider remote/relocation with the right employer.

Experiences

[AWS re/Start Program](#) (Instructor-led full-time job-specific training)

Amazon Web Services, Remote, Feb 2022 – Present

Receiving cloud practitioner job-specific training on building effective front-line support, troubleshooting, escalation, networking, security and task automation techniques through real-world, scenario-based exercises, labs, and coursework using CLI, Linux, Python, Kubernetes and Databases.

[Fullstack Applications with Cassandra Bootcamp](#)

DataStax, Remote, Jan 2022

Successfully completed 4-weeks Application Development Bootcamp focusing on the NoSQL distributed databases, Data Modelling, APIs, and Microservices.

[Training: 5 weeks Product Analytics with Amplitude](#)

The Product Folks, Remote, Dec 2021

Investigated explicit and implicit data capturing and tracking, North Star concept, data scopes, metrics, segmentation/clustering and cohort analysis using analytics tools such as Amplitude, Power BI (Excel), R and SQL queries to clean and transform the raw data into accurate structured tables for descriptive and exploratory analytics.

Certifications

- **Microsoft Azure AI-900, AZ-900, PL-900** | Jan 2022
