Summary

Creative nature paired with a logical approach and a broad range of transferable and interpersonal skills makes me always ready to absorb new ideas and choose effective solutions and quickly and efficiently solve problems.

My vast work experience alongside my technical knowledge in many other areas of Information Technology are resulting in the implementation of best practices in a friendly and positive demeanour maintaining the professionalism level.

Interested in Business Analytics, based on Data Science Methodologies with a drop of Design Thinking and blend of UX.

I'm involved in the [Product Analytics 101 Program](#) with [The Product Folks Community](#)!

The hobby projects to showcase my skills along are on my [Github](#)!

Currently learning paths:

- [IBM Data Science for Business](#);
- [Microsoft Data Analyst Associate](#);
- [Google Cloud Learning](#).

On the way on my learning shelf are:

- Reactive System, Microservices with GO;
- Web Apps with Dart and Flutter.

Looking to secure a position where I can use my outgoing personality, skills and develop new ones.

Achievements

➤ Deloitte Tech Consulting Virtual Internship (28-31/10/2021)

- Cloud Engineering - prepared a high-level overview of Cloud Computing for a client meeting, Cloud Feasibility and Cloud Readiness Assessments.
- Technology Strategy & Innovation - evaluated technology aspects for developing an online banking platform for a client, designed a business case including a high-level overview of the costs, benefits, and considerations and developed a high-level implementation plan and predict cost estimates.
- Optimisation & Delivery - conducted an initial market scan to evaluate and select a few financial accounting systems for the client, market evaluation to identify the best solution to client requirements with further analysis and solution presentation.

Skillset: Industry and Market Scan Research | Feasibility Assessment | Value and Benefit Analysis | Project Planning and Delivery | Cost Analysis and Estimation | Resource Management | Feasibility, Risk and Readiness Assessment | Communication | Presentation.

➤ **Accenture Project Management Virtual Experience (13-15/11/2021)**

- Associated projects to the most suitable project management approach and prepared a streamlined proposal for the client.
- Created a status dashboard for the project and gave a presentation on updates of the project.

Skillset: Project Management | Strategic Analysis | Synthesizing | Communication | Presentation.

➤ **Accenture Nordics Consultant Program (12/11/2021)**

- Defined project key priorities and assembled a project plan for a client.
- Analysed data from various sources and made decisions about UX Redesign.
- Assigned scores to potential initiatives based on their ease of implementation and impact.

Skillset: Planning | Prioritizing | Data analysis | Client relations.

➤ **Accenture UK Virtual Experience Program (07/11-11/11/2021)**

- Identified opportunities to build a strategy using the agile methodology.
- Created a plan for management and completion of a project.
- Produced engaging marketing content for a new product.
- Investigated the product issues based on usage data analysis.

Skillset: Data Analysis | Project Management | Agile Methodology | User Stories | Marketing | Branding | Content Creation.

➤ **PwC Power BI Virtual Case Experience (27/10/2021)**

- Defined KPIs and created a Power BI Dashboard for a Call Centre to visualise customer and agent behaviour.
- Outlined relevant KPIs in hiring, promotion, performance and turnover for a client, designed a Power BI Dashboard and identified the root causes of their slow progress.

Skillset: Defining KPIs | Power BI Dashboard | Insights and Actions | Calculating Measures.

➤ **KPMG Data Analytics Virtual Experience Program (04-06/11/2021)**

- Directed an Assessment of data quality and completeness for analysis.
- Projected high value customers based on customer demographics and attributes through visualisation of insights.

Skillset: Data Quality Analysis | Analytical Dashboard Creation | Customer Segmentation.

➤ **GE Digital Technology Data Analytics Program (01-03/11/2021)**

- Used data engineering to combine full-flight engine, part manufacturing and airport location data and create a KPI dashboard.

Skillset gained: Business Intelligence (BI) | Data orchestration & transformation | Postgres/SQL.

➤ **Smart Cities Virtual Start-up Internship Program (22-24/10/2021)**

Credential: [Sydney School of Entrepreneurship](#)

Operated with start-ups that are leveraging the power of shared mobility, unlocking the distributed renewable energy network, and incentivising real, sustainable societal change:

- Liftango - Developed a business expansion plan for the host organisation into the United States taking into account the concerns of various stakeholders and the constraints of available resources.
- SwitchDin - Developed proposals and collateral to enhance communication of the host organisation's unique value proposition to a particular customer segment. Conduct personal reflections on how the proposed communication method impacts on the host organisation's customer experience
- GreenBe - Developed a "Future Press Release" to communicate the benefits and key features of a proposed solution based off the host organisation's existing platform and capabilities.

Skillset: Customer Insights and Segmentation | Planning | Strategic and Critical Thinking | Risk Management | Stakeholder Management | Problem Identification and Investigation.

➤ **Sydney Romantics Design & Branding Virtual Experience (25-26/10/2021)**

- Created one blog article, two social media posts, 1 poster using Canva as a collaborative tool and identified 2 new creative ways to promote an event in the local area.

Skillset gained: Brand Analysis and Communication | Influencers and Social Media | Marketing and Event Ideation.

After a few years of efficient operations as a Police Officer, was promoted to a Principal Analysts position in a Special Unit.

Details: Performed a variety of analytic reports based on statistical data predicting the dynamics with relevant recommendations.

Created assessments on assigned tasks and targets interpreting data and classified information in comprehensive reports identifying threats to public safety.

Education: Bachelor degree in Criminology and Criminal Justice and Law (09/2001 - 06/2005) (EQF level 6) | Institute of Applicative and Integrative Law Studies, Chisinau Municipality, Moldova

Languages

Details: Available to operate at the highest level independently and in teams, in busy environments using my native Romanian and Russian languages and limited working proficiency (written business communication) in French and Spanish. These are valuable for getting insights from new emerging markets, establish and maintain professional business relationships and foreign exposure of the company. A common language guarantees customers and partners' loyalty offering the opportunity to expand the operations and stimulate revenue growth.
